

HOSE ASSEMBLIES

RB Royal's extensive hose assembly capabilities supply you with customized solutions for your application needs.

Benefits of Hose:

- Flexible
- Vibration or impulse damping
- Accounts for tolerance stack up between components
- Harmonics control

We provide a custom solution for your hose applications to reduce the number of leak paths and increase the reliability of your product.

Hose Assembly Capabilities Include:

- Custom development of components to meet your specific needs
- Design qualification and production lot testing according to your requirements
- Vendor managed inventory solutions to accommodate your inventory and scheduling needs

Kitting Capabilities:

Hose kitting is another value-added process we offer, which allows you to combine several different parts into one "kit" for quick and easy assembly of your final product.

At RB Royal, we design and manufacture custom hose and tube assemblies as well as precision machined products for applications involving fluid power, fluid transfer and systems integration. Call our experts or log onto www.rbroyal.com to find out how we can help you today.
